Software Solutions

I.T. software solutions that are customized to fit your business needs, improve efficiency, drastically reduce errors and increase productivity and profits.

- Business Applications
- School systems
- Payment Gateways
- Fintech solutions
- System Integrations

```
res the appear event when appropriate
var check = function() {
    //is the element hidden?
    if (!t.is(':visible')) {
        t.appeared = false;
        return;
    }

    //is the element inside the visible window?
    var a = w.scrollLeft();
    var b = w.scrollTop();
    var o = t.offset();
    var x = o.left;
    var y = o.top;

    var ax = settings.accX;
    var ay = settings.accY;
    var th = t.height();
    var wh = w.height();
    var tw = t.width();
    var ww = w.width();

    if (y + th + ay >= b &&
        y <= b + wh + ay &&
        x + tw + ax >= a &&
        x <= a + ww + ax) {

        //trigger the custom event
        if (!t.appeared) t.trigger('appear', settings.data);

    } else {

        //it scrolled out of view
        t.appeared = false;
    }
};

//create a modified fn with some additional logic
var modifiedFn = function() {

    //mark the element as visible
    t.appeared = true;

    //is this supposed to happen only once?
    if (settings.one) {

        //remove the check
        w.unbind('scroll', check);
        var i = $.inArray(check, $.fn.appear.checks);
        if (i >= 0) $.fn.appear.checks.splice(i, 1);
    }
};
```

- Fintech Solution

Our Partners

Methodology

At Mcomps, Agile development is our default approach. We embrace an iterative and adaptive methodology to maximize the value of the solutions we develop.

This methodology helps us minimize failures and enables us to scale on those failures, learning and improving along the way. One of the key advantages of Agile is that it allows our customers to have regular visibility into the solution's progress, providing opportunities for immediate feedback and adjustments instead of waiting until the end of the project.

1. Evaluate:

During the evaluation phase, we meticulously assess the requirements and objectives of the project. This involves understanding your unique business needs, conducting market research, and analyzing the feasibility of different approaches. By gaining a comprehensive understanding of your project, we lay the foundation for a successful development journey.

2. Define:

In the definition phase, we collaborate closely with you to define clear project objectives, scope, and deliverables. This includes identifying key milestones, creating a detailed project plan, and establishing transparent communication channels. Our aim is to ensure a shared understanding of the project's direction and goals, setting the stage for effective development.

3. Develop:

The development phase is where the actual creation of the solution takes place. Following the Agile principles, we break the project into smaller, manageable iterations or sprints. This iterative approach allows for incremental development, continuous integration, and regular testing. Throughout this phase, we prioritize collaboration, flexibility, and adaptability to deliver high-quality solutions that meet your evolving needs.

4. Scope:

During the scoping phase, we review and refine the project's scope based on the insights gained during development. This involves assessing progress, addressing any changes or new requirements, and ensuring alignment with your expectations. By continuously monitoring and adjusting the scope, we ensure that the solution remains on track and aligned with your business goals.

Security Statement

At Mcomps, we understand that security is essential for both your business and ours. We prioritize strategic incorporation of relevant security controls to help minimize your business risks. Our commitment to cybersecurity is unwavering, and we offer a comprehensive range of cybersecurity services designed to protect your business from threats.

With our array of cybersecurity solutions, we aim to safeguard your sensitive data, systems, and operations. Our approach includes robust measures such as threat monitoring, vulnerability assessments, secure coding practices, and employee training. By partnering with us, you can trust that we prioritize the security of your digital assets, providing you with peace of mind and a strong defense against potential threats.
